First document

Andrzej Zahorski [*]

January 24, 2021

We have now added a title, author and date to our first LaTeX document!

0.1 Bold, italics, underlining

- **Texting to best friend (bold is textbf) xD - bold**

- *viva la pizza di cardinale - italics*

- <u>underlined text here - underline</u>

0.2 Different faces of *emphasizing*:

- *inside normal text emphasized text is italicized*

- result of emphasis in italicized text - both things are canceling each other out

- ***this is the effect of emphasis inside bold text = bold + italics***

0.3

- LaTeX does not render images by itself, we need **graphicx** package

- we set path for it in Preamble

- then we use *includegraphics*

---

[*]thanks the Internet
